

# The Peconic Teacher Center proudly presents Dr. Amy Baeder's

PROJECT-BASED LEARNING

## Curriculum Developer

CERTIFICATION PROGRAM

START DATE: April 5, 2021

END DATE: June 11, 2021

Maximum of 20 participants

Cost: \$375 3 Inservice Credits \_\_\_\_\_ Register in Peconic Teacher Center's MyLearningPlan

The Certification is a self-paced online program that will help you master the entire process of developing a high-performance PBL unit. You'll walk away with a finished, classroom-ready unit. As you follow the process, you'll get support so you can develop a high-quality PBL unit to use immediately in your classroom—as well as the skills you'll use over and over again to write new units.

Here are the course modules:

- Module 1: What is High-Performance Project-Based Learning?
- Module 2: Digging Deep to Inform & Inspire a Rich PBL Unit
- Module 3: Planning Your Unit's Foundations & 4 Cornerstones
- Module 4: Framing Your Unit from Start to Finish
- Module 5: Peer Review, Publishing, and Celebrating

The PBL Certification is designed to be completed in six to eight weeks, so you can develop a complete PBL unit that you can use immediately in your classroom. Some teachers take more time, and some complete it more quickly. However, you'll get lifetime access to the program, so you can go through it at your own pace and review the modules whenever you'd like.

Here's how each element of the program will support you:

- The video modules will walk you through the entire PBL Roadmap, with step-by-step Action Tasks to bring you closer to your goal in each lesson
- The PBL Unit Plan Book provides the prompts, templates, and tools you'll need to complete your unit
- Live video "Fishbowl Coaching" sessions give you 1:1 support as well as peer feedback
- You'll also have access to our Project-Based Learning Network community, where you can share ideas, ask for feedback, and get connected with resources so you can polish your unit to fit your students' needs.
- You'll be learning the same way your students will learn—by working on an authentic project from day 1, and sharing the final product with real audiences—first your peers in the program, and ultimately, your students!

To earn the PBL Curriculum Developer Certification, you must write a high-performance PBL unit. You'll be guided through each step of this process, with detailed criteria for success, inside the program. Once you complete your unit, you will submit it to Dr. Baeder for feedback and review.
